Dmytro Tymoshenko

Front-end developer

Motivated Front-end Developer with hands-on experience in building responsive web interfaces using **React** , **JavaScript** , **CSS/SCSS** , and **Tailwind CSS** . Skilled in developing modular components, optimizing product performance, and ensuring clean, maintainable code. Familiar with version control systems (Git) and modern libraries for front-end development. Eager to grow in a dynamic environment and contribute to impactful projects as part of a collaborative team.

WORK EXPERIENCE

Trainee Front-end developer
Baza Trainee

09/2023 - 09/2024   *Remote*

Achievements/Tasks

- Developed components for fundraising landing pages using React, CSS, and Tailwind CSS.
- Optimized component performance, reducing bundle size by 20% through dynamic imports.
- Collaborated in technical discussions, contributing to the implementation of multi-language support.
- Conducted code reviews (3-4 per week) and maintained project documentation.
- Created key UI elements, such as progress bars for fundraising status and modal windows for social media sharing.

Trainee/Junior Front-end developer
Freelance

10/2023 - Present   *Remote*

Achievements/Tasks

- Developed MVP features, including user authentication and product filtering, with React and Tailwind CSS.
- Optimized product performance using React.memo and lazy loading, enhancing site responsiveness.
- Refactored CSS with SCSS to improve scalability and maintainability.
- Participated in strategic planning to align development with product goals.
- Coordinated partnerships with external developers and designers to integrate new features smoothly.

EDUCATION

Junior specialist
Zhytomyr technological college

09/2019 - 06/2023   *Zhytomyr*

Courses

- Computer engineering

HARD SKILS

HTML   CSS   JavaScript   TypeScript

Tailwind   React.js

PROJECTS

STO na dorozhnyy (10/2023 - 01/2024) ⬈
- Developed and optimized the visual layout for all website pages, enhancing user experience and engagement.
- Designed and implemented responsive animations, including smooth fade-in/out effects for the FAQ section and complex animations for the process overview section.
- Created an interactive modal window for customer feedback, improving user interaction and service inquiries.
- Developed a service slider using Swiper.js, allowing dynamic content presentation and seamless user navigation.
- Successfully integrated with the backend via API to manage data interactions, ensuring efficient data retrieval and display.

Happy Tails (04/2024 - 07/2024) ⬈
- Developed a user-friendly admin panel interface, ensuring intuitive navigation for ease of use by administrators.
- Designed and implemented reusable components for efficient API interaction, streamlining the product management process.
- Enhanced product management functionalities, allowing seamless addition, editing, and deletion of products from the database.
- Implemented order management features that enable administrators to easily update and manage order statuses.
- Collaborated closely with the team to deliver the MVP on time, contributing to a successful project launch.
